

YOUR STAGE

03 / 05

Credible.

You have a credible baseline profile, but nothing pulls anyone back after the first visit, and there’s nothing on the page telling strangers to trust you.

SECTION 02

Your three highest-leverage gaps.

01

Retention

Why it matters — acquisition without retention is a leaky bucket.

22 / 100

02

Social Proof

Why it matters — strangers need someone else's voice to trust yours.

34 / 100

03

Lead Capture

Why it matters — warm attention with no exit ramp is wasted attention.

38 / 100

SECTION 03

What to fix first.

Sequenced, not a checklist. Each step unlocks the next.

1

You have no retention loop.

Because nothing pulls anyone back after the first visit.

UNLOCKS → YOU'RE MISSING SOCIAL PROOF.

2

You're missing social proof.

Because there's nothing on the page telling strangers to trust you.

UNLOCKS → YOU HAVE NO LEAD CAPTURE IN PLACE.

3

You have no lead capture in place.

Because interested visitors leave without a way to stay connected.

NOW

Credible

Looks legitimate, converts occasionally.

- You look professional at a glance
- You convert when someone is already sold
- You depend on referrals and word of mouth

NEXT → STAGE 4

Growing

Systems in place, consistent traction.

- + A structured content and channel rhythm
- + Lead capture and follow-up wired together
- + Traffic that returns, not just arrives

PATTERN

“Businesses at this stage look credible but almost none have set up retention — most traffic never returns.”

PATTERN-LEVEL OBSERVATION ACROSS BUSINESSES AT STAGE 3. NOT A CLAIM ABOUT ANY SPECIFIC COMPETITOR.

The free report shows your stage and three highest-leverage gaps. The full analysis scores every category, sequences every fix, and ends with a call — so you leave with a plan, not a PDF.

01 Full category breakdown

All ten categories scored and explained — not just the three we surfaced here.

02 Prioritized roadmap

What to fix first, second, third — and why the order matters for your stage.

03 10-minute strategy call

A real strategist walks you through the roadmap and answers what the report can't.

On the call, we walk through the roadmap together. You can take it and run it yourself, or bring us in to execute. Either is fine — the report and the call stand on their own.
